Winkonlaser
Bringing Beauty and Love by Technology

Introducing DM40P

Customize hair removal across a wide range of skin tones like never before.

AresLite® is that the laser energy of a specific wavelength is absorbed by the melanin in the hair follicle, and then converted into heat, which raises the temperature of the hair follicle tissue and ultimately achieves tissue destruction.

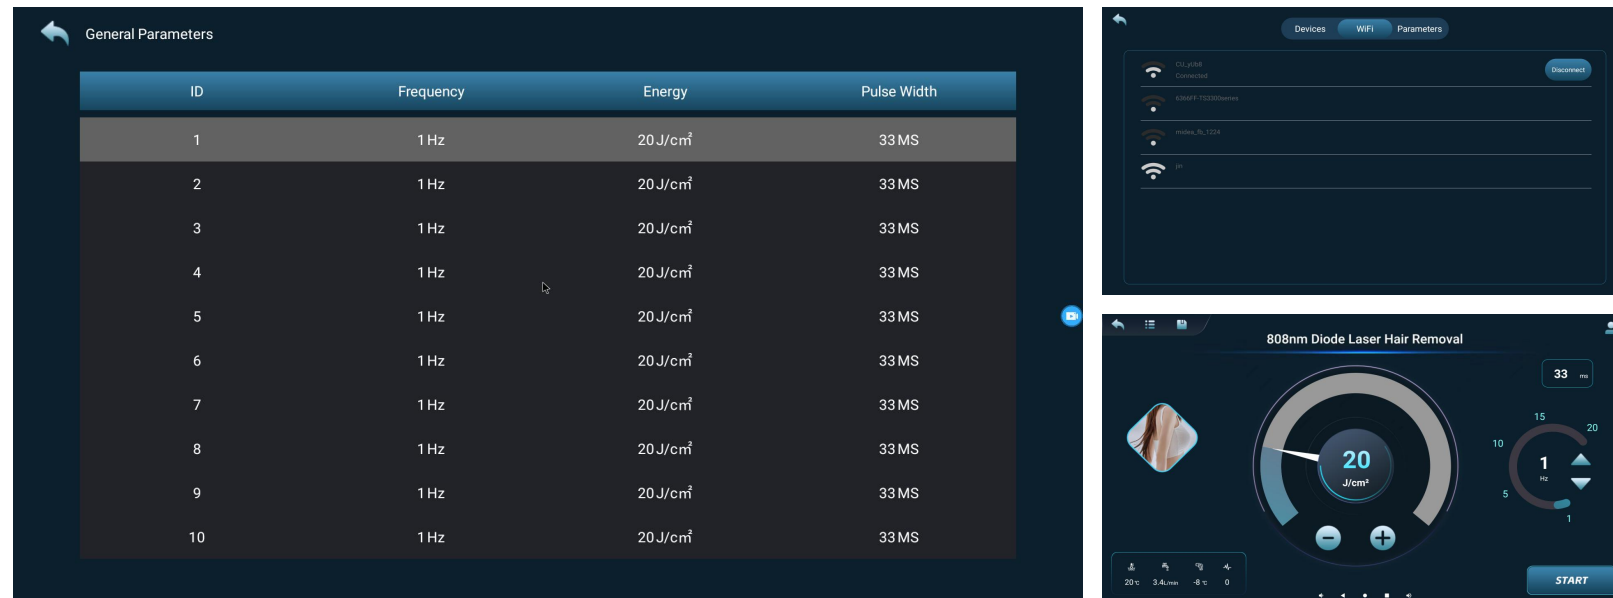

-  Use FAC Technology To Get 99% Energy Transfer Efficiency
-  Diode laser No Crystal design, handle piece are pretty light,It allows you to work in a comfortable state for a long time and Reduce the probability of handle damage.
-  Areslite diode laser use IP65 high grade waterproof, fully enclosed to prevent dust from entering
-  Areslite® diode laser design better than microchannel

The DM40Plus System Highlights

ANDROID SYSTEM

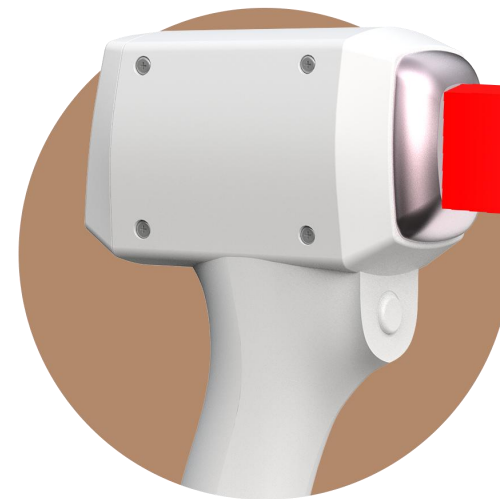

- 1-Smart interface, easy to operate, 8 different languages.
- 2-More safe and effective treatment for various skin colors and different hair types.
- 3-Upload website, display different treatment projects online, and attract customers intelligently.
- 4-Equip with hair follicle detection technology, customers can clearly see the hair density, and can take photos for recording. The customers can directly see before and after comparison pictures after treatment.
- 5-Customer treatment records can be set. Each customer has exclusive treatment records and recommended parameters, support one-click archive.
- 6-Rental system is available, the machine will enter into automatic locking mode after rental is over.
- 7-The screen can store videos, such as beauty salon introduction videos, customer's treatment videos, promotional videos, etc.
- 8-The machine itself comes with 10 groups different general recommended parameters, easy operation even no experience.

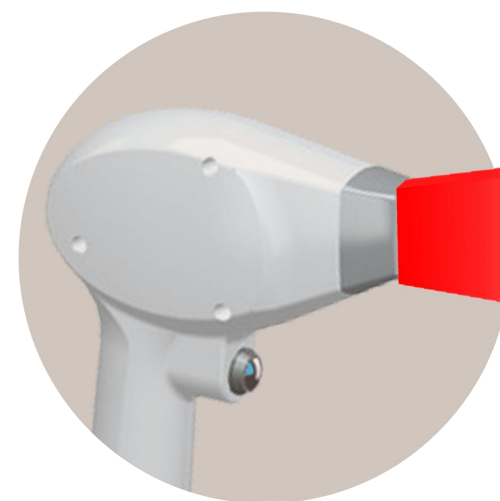

Synergetic Technologies. Superior Results.

AresLite® diode laser hair removal machine, is equipped with the latest black technology FAC technology, and the spanlife is as high as 100 millions, which is more than 5 times that of other lasers, ensuring your long-term efficient use

Using the world's leading optical **LIMO brand Fast Axis Collimation Free-surface micro-optical technology**, short-distance beams are quickly focused, and the energy density is higher under the same pulse width, achieving high peak power and narrow pulse width hair removal, greatly improving the hair removal effect and experience.

Add FAC: Beam Focus.
At a working distance of 32mm, the energy density is 10J/cm²@20ms

Without FAC: The Beam Diverges Rapidly.
At a working distance of 32mm, the energy density about 2J/cm²@20ms

Brand	AresLite®
Technology	Non-crystal Diode Laser Hair Removal Technology
Wavelength	3 wavelengths 755nm Alexandrite laser + 808nm Diode laser + 1064nm Yag laser
Spot Size	15*20mm/15*30mm
Laser Device (Laser bar)	USA Coherent imported laser device
Laser Device Energy	600W-3000W
Touch Screen	15.6 inch Android color touch screen 4 inch color touch screen
Output Energy	FHR: Up 12J/cm2 adjustable HR: Up 100J/cm2 adjustable SR: Up 25J/cm2(±10%) adjustable
Pulse Width	1-400ms
Frequency	1-20Hz
Cooling System	Wind + Water + Semiconductor + Software
Voltage	110V/220V; 50Hz-60Hz

- * 3 Years Warranty
- * FHR/HR/SR all in one
- * Up 200 Million Lifespan
- * Intelligent linkage multi-touch HD screen
- * CLINICALLY PROVEN 3D TECHNOLOGY
- * SIFHR® 20Hz Least Painful experience
- * 3 Seconds Temperature Control System
